Skills

Go

Docker

TypeScript / JavaScript

Python

Knowledge in [DB](#) management, [Kibana](#) and [Grafana](#) for data visualization, as well as [Datadog](#). [Kubernetes](#) for container deployment or [Vault](#) for secret management. Due to our last project (integrating [Backstage](#)), I also gained a lot of experience in [node.js](#) and [React](#). Also good knowledge in [Git](#), the [GitFlow](#) and a bit of [GitOps](#), as we recently started worked on integrating [ArgoCD](#) as our deployment tool, and [CI/CD](#).
Usage knowledge in team management tools such as [Confluence](#), [Jira](#), [Slack](#), [Trello](#) or [Teams](#).

Education

B.Sc. Telecommunications Engineering
[University of Vigo](#)
Vigo, Spain
Aug 2016 - Jul 2020

Software Development
[Oulu University of Applied Sciences](#)
Oulu, Finland
Aug - Dec 2019 – Erasmus Semester

Languages

Spanish	Native
English	C1
German	B2

Professional Experience

Software Engineer – *Engineering Enablement Team*
[Upvest](#) | Berlin, Germany & remote | 01/2026 - present

- Part of the Engineering Enablement Team in the Platform tribe
- More to be done
- ...

Software Engineer – *Delivery Engineering Team*
[Spreadgroup](#) | Leipzig, Germany & remote | 12/2021 - 12/2025

- Promoted from Junior to Software Engineer in April 2024.
- Built and maintained internal developer tools in **Go**, simplifying infrastructure interactions and improving developer productivity.
- Led the development of an **internal software catalog**, used by ~100 engineers, using Backstage, including custom plugin and open-source contributions adopted by a wider community.
- Enhanced DevOps practices by optimizing **CI/CD** workflows with Kubernetes and **ArgoCD**, while working closely with platform teams to strengthen overall developer experience (**DevEx**).

Software Developer – *Research and Development*
[University of Vigo](#) | Vigo, Spain | 02/2020 - 11/2021

- Migrated internal applications to hexagonal architecture in **Go**, enhancing scalability, maintainability and service integration.
- Conducted research and implemented signal processing solutions in **Python** for academic and industry projects.

Internship
[Muutech Monitoring Solutions](#) | Vigo, Spain | 06/2019 - 07/2019

- Researched and developed anomaly detection algorithms for industrial IoT using Python and R
- Applied Machine Learning techniques to improve predictive monitoring and maintenance workflows.

Skills (in progress)

Platform & Cloud Infrastructure: Kubernetes (cluster operations, deployments, GitOps), Docker, HashiCorp Vault (secrets management), Linux

Developer Experience & Platform Tooling: Software catalogs (Backstage), Custom Backstage plugin development, Internal developer platforms, Self-service tooling

CI/CD & Automation: ArgoCD, CI/CD pipeline design and optimization

Programming: Go (primary), Python, Typescript

Observability & Reliability: Grafana, Prometheus, Centralized logging

Data & Storage: PostgreSQL, MySQL, MongoDB
